

## Equations, Inequalities, Sequences and Graphs:

Objective	Sparx Task	
Plot linear graphs from equations and tables of values	M932	
Plot two linear graphs on the same axes and solve from the graph	U836	
Solve pairs of simultaneous equations algebraically	U757, U760	
More practice solving simultaneous equations	U757, U760	
Rearrange an equation into form $y=mx+c$	M888	
Identify the equations of horizontal and vertical lines	M888	
Identify the y intercept from the equation and the graph	M888	
Identify the gradient from the equation and the graph	M888	
Identify the equation of a straight line from a graph	M888	
Use $y=mx+c$ to identify parallel lines	U377	
Read distance time graphs	M581	
Read speed time graphs	U937	
Find the acceleration from a speed-time graph	U562	
Find the speed from a distance time graph	U462	
Plot simple quadratic graphs	U989	
Plot simple cubic graphs	U980	
Recognise and draw reciprocal graphs	U593
